Sevankur Bharat Signs MoU with Government of MP

A new chapter begins for Sevankur Bharat in Madhya Pradesh.

We are honoured to begin our collaboration with the Government of Madhya Pradesh through an MoU to nurture SEVA — Service, Empathy, Values and Accountability among medical students across the state.

The journey has now begun with a video conference chaired by **Hon'ble Deputy Chief Minister and Health Minister Shri Rajendra Shukla Ji**, along with the Deans of medical colleges across Madhya Pradesh. We look forward to bringing our learnings from decades of nurturing value-based healthcare professionals to a new generation of doctors through service-oriented initiatives.

For us, this is an opportunity to work together towards creating doctors who are not only skilled in medicine, but also deeply connected to society and committed to serving the nation.

This Online Bauddhik session was arranged by Nashik Vibhag of Uttar Maharashtra Prant. Total 180 Sevankurites connected across India.

Padmashri Nivedita Didi Bhide shared her thoughts on nation building, she explained that to know India, we need to study its core scriptures as well as understand social philosophy.

While explaining Swami Vivekananda's views on the diversity within Indian culture, she mentioned that just as truth is one but we know it by different names, Dharma is one but has different names, and God is one but called by various names.

It is because of this philosophy that Indians have been taught to respect diversity in everything.

Explaining the meaning of Dharma, Didi stated that the oneness of the universe is Dharma.

"Society should change as per the truth or die..."

She stated that Dharma means: Conducting oneself with empathy and affection, Fulfilling our duty towards society, Sacrifice through body, mind, and wealth, When faced with a Dharma Sankat, prioritizing the broader duty over the duty of a smaller. By walking on this path of ideology, we can build India.

Following the address, Didi satisfactorily answered and resolved the questions raised by the students.
